

**Treasury of Knowledge
Encyclopedia Series**

By

Bobak Etemadi

About the Author

Bobak Etemadi is a contemporary Iranian encyclopedist, lexicographer, researcher, writer and educator.

He is the author of over 40 books and has contributed to Persian dictionary-making as a practical lexicographer. He has also written extensively on encyclopedias, focusing on general reference books. His research and publications identify him as a modern encyclopedist.

Selected Works

He is noted for being the author of "Bobak Etemadi Dictionary", a comprehensive Persian dictionary, which contains more than 15000 entries and provides coverage of different areas of academic study. This massive 10-year project is considered his magnum opus.

Of his selected works, we can mention "Encyclopedia of Facts", that is a wide-ranging general encyclopedia written in the Persian language containing over 2400 articles. "Encyclopedia of Famous People" is an elaborate book on biographies and his reference works, "School Encyclopedia (9 Vol. Set)" and "Superior Thought Encyclopedia" are compilations of extensive range of topics.

"Year by Year", "Timeline of Human Science", "Timeline of Human Inventions" and "War" present the world in chronological order and his encyclopedia of "History" is a presentation of a body of knowledge whose core is about historical perspective of various subjects.

"The First Family Doctor" provides information on a wide variety of diseases and health disorders and "Encyclopedia of Nutrition" is a health reference covering various modern and traditional diets, nutrition and dietary practices. His other reference books on medical sciences are "Medicine and Health" and "Human Body".

Young Adult Literature

His first collection of encyclopedias, "Treasury of Knowledge (6 Vol. Set)", which aimed at young adults, gave him immediate status as a writer. Later on, his other authoritative general knowledge resource books, "Comprehensive Student Encyclopedia (2 Vol. Set)" and "Primary School Illustrated Encyclopedia", garnered a lot of attention among children and teenagers.

In the realm of subjects of interest to young readers, we may as well mention "Young Scientist Encyclopedia", "Learner's Encyclopedia", "Children's Reference Book", "My Cartoon Encyclopedia", "Mythological Creatures" and "Encyclopedia of Teenagers". These books

are basic general knowledge references in alphabetical order with initiative design.

Other Works

He has authored a large bulk of other reference books on science, politics, history, geography, arts, culture, computer science, technology, space, sports, tourist attractions, choosing majors, nature, animals, plants, natural environment, paleontology and nuclear energy.

Iranization of His Works

As Persia was a cradle of science in the past, in his books he has paid considerable attention to contributions of Iranians to various fields of engineering and philosophy, golden era of Persian science, notable discoveries and innovations by national researchers and scientists, prominent institutions of modern learning and Iran's indigenously designed equipment using domestic know-how.

He has always been intrigued by the culture of Iran, so in a nationalistic approach, the scope of his encyclopedias go beyond contributions of Iranians to science and technology and deliberate attempts have been made to highlight Iranian culture and history as well as encompassing aspects of Persian peoples and literature. As a result, his works may be used as a research tool for scholars in Iranology.

Management and Teaching

Being an EFL/ESL certified instructor from the University of Cambridge and having specialized in exam preparation courses, he has prepared numerous students for success on English standardized tests such as IELTS, TOEFL, CPE, SAT, GRE, GMAT and LSAT in different countries and has held Director of Studies (DOS) positions and management roles as well as teaching, in various language institutions.

As a senior trainer, he has conducted many teacher training courses and seminars, methodology workshops and Language Awareness courses.

Other Activities

Outside work, he is a martial arts referee and trainer. He is a Certified Black Belt (2nd Dan) in kickboxing (WKU/GCO world) and holds World Kickboxing and Karate Union's Level A referee license (International Master Referee) and Level A coach license (Master Trainer License).
